

Genji Kurisu received his Ph.D. from Osaka University in 1997. Upon completing his doctorate, he began his academic career at the Institute for Protein Research (IPR), Osaka University. He subsequently spent two years at Purdue University. Following this period, he joined the University of Tokyo, where he worked for five years before returning to Osaka University in 2009 as a full professor of IPR. Since 2017, he has served as Head of the PDBj at IPR and currently serves as Director of the institute. He has authored or co-authored 174 scientific publications spanning crystallography, structural biology, chemistry, databases, photosynthesis, and molecular motors. His distinctions include the Young Crystallographer Award from the Crystallographic Society of Japan (CrSJ), the CrSJ Award in 2016, the Osaka Science Prize from Osaka Prefecture in 2019, and the Commendation for Science and Technology by the Minister of Education, Culture, Sports, Science and Technology in 2020. He served as President of the Asian Crystallographic Association (AsCA) from 2023 to 2025 and currently serves as its Immediate Past President.
