

Wenfei Li is a Professor of Physics at Nanjing University. He earned his Ph.D. from the Chinese Academy of Sciences in 2004, and subsequently conducted postdoctoral research at Nanjing University (2004–2006) and Kyoto University (2008–2010). He also worked as a visiting scholar at the Laboratory of Chemical Physics, National Institutes of Health (NIH), from 2017 to 2018. His research centers on theoretical and computational biophysics, with a particular focus on molecular simulations of conformational dynamics and phase behavior in complex biomolecular systems, as well as AI-driven molecular simulations and dynamics predictions of biomolecules.
